Our Vision

is to Inspire Positive School Interactive

Education

Our children's future depends on the education they receive in school. It is important that we create a good environment and system for them to study.

Diverse

To improve the entire national education system, it is mandatory that our structure has diverse functions stemming from school reports to the last word of a textbook.

Operating System

All schools that signed up with us will operate under the School Interactive System (SIS) with all of their data stored and protected in our database.

Our Mission

Connecting Parents and Students

Our mission is to use technologies to pave the way for parents and children to have borderless distance communication. To achieve that, EDUDIOS introduces an education system service to all schools.

We do this by designing and developing a mobile app, that support all the school management and student supervision across the region especially in Southeast Asia.

The mobile app will then run on our School Interactive System (SIS) in an effective and efficient method.

EDUDIOS
SDN BHD

The Origami represents who we are as a brand. Like the paper folding technique: we create a pattern, structure and transform it into something new.

We convey our identity, philosophy and vision through every geometrical shapes, dots and lines that are joined together. It portrays the idea of connecting people and the growth of our company.

Designed with diverse colours and a feeling of dynamic movement, we aim to create a better future for our customers.

How **Edudios** Was Found

Back in 2014, a headmaster approached us of his issues faced in school. He was seeking for a developer that could bring a new method for the education management. It was during this meeting that the idea of an interactive school systems born.

Thus, **EDUDIOS** was founded. With the successful implementation of the school system into our database, we soon launched the earlier version of the School Interactive System (SIS) application for interested schools.

As of today, we have more than 300 institutions that has signed up with us and over 300,000 of customer base in our system.

Products & Services

SIS-Provides friendly and simple school work system which is easy to operate so that operation of the school may be smoother.

21st Century is an era of technology, internet, smartphone, Cloud and Cloud computing, all with vast room for development. If an organization or a school is unable to keep up with the pace of technology, then they will be left behind. Currently many schools and educational institutions are mainly concentrating on hardware facilities and neglected the importance of software development. Schools must run together with time, SIS definitely can make up this shortfall!

Improve On Security System

Improve on security for kindergarten add on GPS Tracking features on in 2017

988电台名主持湘君的访问。关于《学校综合行政系统 SIS》的创业历程。

What We Achieved — 300 Schools

EDUDIOS' core clients include primary and secondary institutions throughout peninsular and east Malaysia. Current EDUDIOS clients include **300 Schools**. Over the past two years, our clients have been impressed by our School Interactive System (SIS) that has now expanded to other countries in Asia.

EDUDIOS have been invited by Malaysian press and radio such as Kwong Wah Yit Poh, Sin Chew Daily, Nanyang Siang Pau and Melody FM to feature our expertise. We believe that our SIS presents the opportunity to go beyond the normal education system and make a genuine difference to students, parents and teachers alike. Our track record and dedication to implementing positive school interaction provides an assurance for our services.

SIS is Accessible on Phone, Tablet and Computer

The School Interactive System (SIS) is a bold initiative of EDUDIOS to transform the national education structure. It is designed to suit all levels of framework from preschool to secondary institutions throughout the world. SIS is created to benefit the entire organisation flow from Ministry of Education (MOE) and school management team to the students and their parents. The system also fulfils 7 out of 11 SHIFTS of Malaysia Education Blueprint (PPPM) 2013 to 2025.

With the system completed and approved, the SIS is integrated into a mobile app to be developed for each school. The app will allow principals, teachers, parents and students to learn, communicate and interact with each other. It is also a platform that work as a school monitoring and management system.

If customers are unable to access the app, EDUDIOS offers another solution by using our services on a computer via web browser.

Database

Stored and Protected by Exabytes

The School Interactive System (SIS) is a one-stop centre that supports all education information access. It offers an available platform for course documentation and download to learning materials such as homework, report, attendance, statistics, lesson plans, exam question bank and textbook syllabus.

The information will be stored and protected in the SIS database hosted by Exabytes, which is specialized in providing the best hosting solution to its customers.

Thus, EDUDIOS can offer a safe database from security threats that prevents people from gaining access to private informations and keep the site safe from hackers, malware and other threats of being blacklisted by search engines.
